

The New Childrens Fund

Although much of our work with children revolves around education, especially with orphans, increasing over the past few years we have been looking at many other avenues of helping children in need.

'The Childrens Fund' has been setup for projects designed for children

Helping Children in Need

Sports Equipment: Iraq & The Gambia

Millions of impoverished children, especially those in refugee camps, orphanages and war zones, have never known the carefree joy of simple childhood games or the sense of accomplishment that comes from teamwork. Sport is in fact, much more than just games, it's a way to teach unity and promote peaceful resolutions to conflict.

MH has been providing sports equipment to poor school children in orphanages in Baghdad and The Gambia. Apart from the expected joy and pleasure gained by the children, our field workers too have found the project particularly satisfying!

The Gambia: Sports equipment for Bunjeng School

China: 70 children receive cleft-lip correction

Children in Prison: Sudan & Pakistan

A recent Pakistani survey showed there were nearly 500 children in prisons, in NWFP alone! Many had been awaiting trial for several years. MH has started a pilot scheme in **Lahore** and **The Ondurman Prison in Khartoum** for women (with their innocent children living with them). We work with young children through the prison school. MH has provided funds for teaching materials and recreation and gifts to the children.

China Medical care: Cleft Lip & Palate Correction Surgery

Cleft lip and palate sufferers have problems feeding, with speech and sometimes hearing too. Corrective surgery is highly specialised and expensive, so many poor children have to continue suffering. MH China has this year completed corrective surgery for 70 poor children in the Lin Xia area. (see p.11)

£250: Cleft-lip & palate correction surgery / child

Keep children smiling - support the Children Fund.
